· **Portfolio**: https://blanca-portfolio-two.vercel.app

Profile

Software Engineer with 7+ years of experience building software across consulting, defense and banking environments. Specialized in Java and Kotlin backend development, microservices and distributed systems, with hands-on experience in infrastructure, CI/CD and technical leadership. Experienced in complex enterprise environments, cross-team collaboration and translating business requirements into technical solutions.

Experience

ING — Senior Software Engineer

2024–Present · Madrid, Spain

Document Management & Automation Platform

- Contributed to the development of a document management platform for mortgage and loan applications, increasing process automation to 50% and reducing reliance on manual workflows and external providers.
- Developed backend services using Java and Kafka in a microservices environment, integrating internal banking systems and external providers across complex legacy architectures.
- Reduced document status visibility from **weeks to 1 minute–4 hours**, enabling customers to track document status through the web.
- Automated identification-document classification, data extraction and validation, reducing processing to **15–20 seconds**.
- Helped establish end-to-end document traceability, improving operational visibility and addressing document loss and status-tracking issues.
- Took technical ownership across three engineering teams, coordinating with Product Owners, architects, providers and business stakeholders.

Loan & Mortgage Refinancing Platform

- Contributing to the design and development of a new platform to automate the refinancing process for loans and mortgages.
- Combine hands-on Java development and code reviews with technical design, system integration, infrastructure work and cross-team coordination.
- Act as Scrum Master and technical point of contact, supporting backlog management, refinement, release coordination and technical decision-making.

Application Maintenance

Maintained and supported a third-party legacy application running on JBoss and virtual machines, implementing deployment automation with Ansible, certificate and credential management, and custom monitoring solutions to meet internal infrastructure and operational requirements.

AUTENTIA — Software Engineer

2020–2024 · Madrid, Spain

- Developed backend solutions across multiple client projects in a consultancy focused on software quality and engineering best practice s.
- Built services using Java, Kotlin, Spring Boot and Micronaut, applying microservices, REST APIs, Domain-Driven Design and Hexagonal Architecture.
- Applied Clean Code, automated testing and code reviews, contributing to a strong engineering culture based on knowledge sharing and continuous learning, writing tutorials for well-known technology blogs in Spain *https://adictosaltrabajo.com/author/blanca-asensio-torres/* or giving talks about microservices on YouTube *https://www.youtube.com/watch?v=uKPKcLhS3pw*
- Worked with relational and NoSQL databases and gained additional frontend experience with Angular and TypeScript.

ESCRIBANO — Software Engineering Intern → Software Engineer

2018–2020 · Madrid, Spain

- Developed embedded C++ software for the defense sector, gaining experience in low-level development and specialized engineering systems.

Education

Bachelor's Degree in Computer Engineering (BSc) — University of Alcalá, Spain

Second-best academic record in the graduating class.

Technical Skills

Languages & Backend: Java, Kotlin, Spring, Spring Boot, Micronaut, REST APIs, Maven

Architecture & Quality: Microservices, Kafka, DDD, Hexagonal Architecture, JUnit, Mockito, Clean Code, Code Reviews

Infrastructure & CI/CD: OpenShift, Kubernetes, Docker, Ansible, Linux, Jenkins, GitHub, SonarQube, Nexus

Databases & Search: PostgreSQL, MySQL, Oracle, MongoDB

Additional: Angular, TypeScript, Agile, Scrum, Technical Leadership

Languages & International Experience

Spanish: Native

English: Advanced

International experience: Lived in The Hague, Netherlands, for six months, gaining firsthand experience of Dutch culture and everyday life. Interested in returning to work in an international engineering environment.
