CV - Blanca Asensio

BLANCA ASENSIO

Senior Software Engineer | Backend · Distributed Systems · Technical Leadership

Madrid, Spain

· **Email**: asensiotorresblanca@gmail.com

· **LinkedIn**: https://es.linkedin.com/in/blanca-asensio-9b5592183?trk=public_post_feed-actor-name

PROFILE

Software Engineer with 7+ years of experience building software across consulting, defence and banking environments. Specialized in Java and Kotlin backend development, microservices and distributed systems, with hands-on experience in infrastructure, CI/CD and technical leadership. Experienced in complex enterprise environments, cross-team collaboration and translating business requirements into technical solutions.

EXPERIENCE

ING — Software Engineer

2024–Present · Madrid, Spain

Document Management & Automation Platform

- Contributed to the development of a document management platform for mortgage and loan applications, increasing process automation to 50% and reducing reliance on manual workflows and external providers.
- Developed backend services using Java and Kafka in a microservices environment, integrating internal banking systems and external providers across complex legacy architectures.
- Reduced document status visibility from **weeks to 1 minute–4 hours**, enabling customers to track document status through the web.

- Automated identification-document classification, data extraction and validation, reducing processing to **15–20 seconds**.
- Helped establish end-to-end document traceability, improving operational visibility and addressing document loss and status-tracking issues.
- Took technical ownership across three engineering teams, coordinating with Product Owners, architects, providers and business stakeholders.

Loan & Mortgage Refinancing Platform

- Contributing to the design and development of a new platform to automate the refinancing process for loans and mortgages.
- Combine hands-on Java development and code reviews with technical design, system integration, infrastructure work and cross-team coordination.
- Act as Scrum Master and technical point of contact, supporting backlog management, refinement, release coordination and technical decision-making.

AUTENTIA — Software Engineer

2020–2024 · Madrid, Spain

- Developed backend solutions across multiple client projects in a consultancy focused on software quality and engineering best practices.
- Built services using Java, Kotlin, Spring Boot and Micronaut, applying microservices, REST APIs, Domain-Driven Design and Hexagonal Architecture.
- Applied Clean Code, automated testing and code reviews, contributing to a strong engineering culture based on knowledge sharing and continuous learning.
- Worked with relational and NoSQL databases and gained additional frontend experience with Angular and TypeScript.

ESCRIBANO — Software Engineering Intern → Software Engineer

2019–2020 · Madrid, Spain

- Developed embedded C++ software for the defence sector, gaining experience in low-level development and specialized engineering systems.

EDUCATION

BSc in Computer Engineering — University of Alcalá, Spain

Second-best academic record in the graduating class.

TECHNICAL SKILLS

Languages & Backend: Java, Kotlin, Spring, Spring Boot, Micronaut, REST APIs, Maven

Architecture & Quality: Microservices, Kafka, DDD, Hexagonal Architecture, JUnit, Mockito, Clean Code, Code Reviews

Infrastructure & CI/CD: OpenShift, Kubernetes, Docker, Ansible, Linux, Jenkins, GitHub, SonarQube, Nexus

Databases & Search: PostgreSQL, MySQL, Oracle, MongoDB, Elasticsearch

Additional: Angular, TypeScript, Agile, Scrum, Technical Leadership

Languages: Spanish — Native · English — Advanced
